- Agile processes utilizing Jira

PROJECTS

Telos DAC IDMS Integration

📅 2019 - Ongoing   📍 Intellisoft Identity Software Solutions

Designed, implemented and supported a Windows Service application which syncs IDMS personnel information regarding background investigations with the Telos DAC for airport communication with the TSA.
- Utilized: C# | Windows Services | Windows Forms | SQL

AWS VPN Management Service

📅 02/2019   📍 Infor CloudSuitePortal team

Designed, implemented, tested and supported a VPN management feature for automating client VPN setup through the AWS VPN Service.
- Utilized: C# | HTML/CSS | Javascript | SQL | AWS API Gateway | AWS Lambda | AWS SQS

Web EDH Deck Builder Tool

📅 07/2019 - 11/2019   📍 Personal Project

Built a Magic the Gathering card search, deck building and card buying tool which allows for the user to search against card text and customized 'keywords' to optimize deck building processes.
- Utilized: AWS Serverless | AWS Step Functions | C # | Python | DynamoDB | S3 | Route53 | CloudFront
